## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

<sup>112, or e</sup>  
Claims rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to  
particularly point out and distinctly claim the subject matter which applicant regards as the  
invention.

- A) Claims 1-12 are confusing. The claim appears drawn to a product claim but it is unclear as to whether the claim is drawn to a method, the nucleic acid or polymer. The use of the passive voice has made unclear and the lack of clarity of the boundaries of the preamble render the claim indefinite. The claim should be rewritten to explicitly state the limitation of the claim.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or  
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 1656

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Rovera et al (US6,221,635 Arpil 24, 2001).

Rover a et al teach a solid phase array in which UV dosage crosslinks the poly dT containing primers (see whole doc. esp col. 4 line 26-30). The poly T contain about 20 T at the 5' end (see col. 11 lines 40-49). They teach using the primer to hybridize to template for amplification (see col. 11 lines 65-66).

## **SUMMARY**

3. No claims allowed.
